

The Igaware Network Protector delivers a full set of defences, which together, protect your entire network. Continuous automatic updates ensure defences are always optimised against new threats as they emerge.

**Here's what the Network Protector delivers:****Email Security**

The Igaware Protector keeps your inboxes free from spam, viruses and other malicious content.

**Internet Security**

Enterprise class firewall protects against unauthorised access, inbound and outbound. Supports VPN for site to site connectivity and remote working.

**Web Filtering**

Web Filtering allows you to implement web access policies and to monitor staff Internet usage. Integrates with Active Directory for single sign on authentication.

**Network Monitoring**

Network monitoring tools provide a heads up to issues with your network, helping you avoid potential downtime.

## Technical Specification

### General

- High performance network security appliance
- Automatic updates and system monitoring
- Easy to use web interface
- Highly configurable
- Compatible with Windows, Apple & Linux O/S
- Scalable
- Available in range of hardware configurations including small form factor, tower and rackmount servers

### Internet Security

- Intrusion Detection & Prevention
- Stateful Inspection Firewall
- DMZ
- VPN (IPSEC, PPTP, SSL)

### Email Security

- Anti-Spam
- Anti-Virus
- Anti-Mail Bombing
- Anti-Phishing
- Content Filtering
- Reporting
  - By user and date showing sender, recipient, size and subject
  - Details of all spam, viruses and filtered content
- Exchange Integration for user verification

### Web Filtering

- Web Content Control
- URL Filtering
- Reporting
- Active Directory Integration for Single Sign On

### Support

- Remote Management
- Proactive System Monitoring
- Automatic Updates
