

The Igaware Linux Small Business Server delivers all the essential IT services a business needs in a secure, robust, easy to use and cost effective solution.

### **Email Serving & Collaboration**

The Linux Small Business Server uses the award winning Zarafa email and collaboration server to allow you to share email, calendars, contacts and tasks via Outlook, and on the move using your PDA, Blackberry, mobile phone and Web access.

### **File Serving**

Centralised file serving on the Linux Small Business Server allows documents to be stored securely and shared between authorised users and groups.

### **Remote Working VPN**

Out of the office staff can access documents and emails on the Linux Small Business Server, securely over the Internet. Remote offices can also be linked securely together, over the Internet.

### **Data Backup**

Data can be backed up to locally or offsite for disaster recovery. Whether you accidentally delete an important file or lose all your business data in a disaster, Linux Small Business Server backup options ensure all your data is safe.

### **Email Security**

Email is filtered keeping your inboxes free from spam, viruses and other unwanted content.

### **Internet Security**

Enterprise class firewall protects against unauthorised access to your data and systems.

### **Web Filtering**

Enables you to control and monitor staff use of the Web.

### **Network Monitoring**

Automatic monitoring provides a heads up to any issue with your network, such as running low on server space, or a failed backup. Issues can be addressed before they become a problem.

### **Automatic Updates**

Updates ensure that the Linux Small Business Server is always secure and up-to-date and are inclusive of new features and functionality.

## Technical Specification

### General

- High performance multi-functional Linux Small Business Server
- Automatic updates & system monitoring
- Easy to use web interface
- Highly configurable
- Compatible with Windows, Apple & Linux O/S
- Choice of configurations
- Scalable
- Available in a range of hardware configurations including small form factor, tower and rackmount servers - RAID as standard

### Server Functions

#### Collaboration

- Email Server (POP3/IMAP/SMTP)
- Web Groupware (Web Mail, Shared Calendars, Contacts, Tasks)
- Zarafa Server (Outlook Integration for Email, Shared Calendars, Contacts & Tasks)
- Mobile, PDA, Blackberry, iPhone Synchronisation
- Web Server
- Intranet Server
- Fax Server
- File Server
- FTP Server
- Web Cache/Internet Accelerator

#### Security

- Intrusion Detection & Prevention
- Stateful Inspection Firewall
- DMZ
- VPN (IPSEC, PPTP, SSL)
- Email Archiving
- Web Content Control
- URL Filtering
- Email Security (Anti-Virus, Anti-Spam, Anti-Phishing, Content Filter)
- Web Security (URL Blocking, Content Filtering)
- Network Vulnerability Scanner

#### Disaster Recovery/Business Continuity

- Data Backup (to local or offsite media/device)
- Automatic Offsite Backup (Rsync)

### Network Management

- Reporting (Web, Email, VPN)
- Web Administration Interface
- Network Device Monitoring
- Network Detection (NMAP)
- DHCP Server
- VLAN
- LDAP
- DNS
- Time Server
- Windows & Active Directory Integration (including PDC)
- Network Tools (NMAP, PING, WHOIS, Trace Route)
- Multi WAN for Failover & Load Balancing

### Support

- Fully Managed Solution
- Proactive System Monitoring
- Automatic Updates
